

- The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
- 2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
- 3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

4. REMINDER

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

International application No. PCT/GB2005/000297

		x No. III Non-establishment of opinion with regard to novelty, inventive step and industrial plicability
 The questions whether the claimed invention appears to be novel, to involve an inventive step (to be nor obvious), or to be industrially applicable have not been examined in respect of: 		
		the entire international application,
	\boxtimes	claims Nos. 21-24
	bed	cause:
		the said international application, or the said claims Nos. relate to the following subject matter which does not require an international preliminary examination (specify):
		the description, claims or drawings (indicate particular elements below) or said claims Nos. are so unclear that no meaningful opinion could be formed (specify):
		the claims, or said claims Nos. are so inadequately supported by the description that no meaningful opinion could be formed (specify).
	\boxtimes	no international search report has been established for the said claims Nos. 21-24
		a meaningful opinion could not be formed without the sequence listing; the applicant did not, within the prescribed time limit:
		furnish a sequence listing on paper complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.
		☐ furnish a sequence listing in electronic form complying with the standard provided for in Annex C of the Administrative Instructions, and such listing was not available to the International Preliminary Examining Authority in a form and manner acceptable to it.
		□ pay the required late furnishing fee for the furnishing of a sequence listing in response to an invitation under Rules 13ter.1(a) or (b) and 13ter.2.
		a meaningful opinion could not be formed without the tables related to the sequence listings; the applicant did not, within the prescribed time limit, furnish such tables in electronic form complying with the technical requirements provided for in Annex C-bis of the Administrative Instructions, and such tables were not available to the International Preliminary Examining Authority in a form and manner acceptable to it.
		the tables related to the nucleotide and/or amino acid sequence listing, if in electronic form only, do not comply with the technical requirements provided for in Annex C-bis of the Administrative Instructions.
		See separate sheet for further details

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/GB2005/000297

Re Item III.

1) Claims 21-24 do not clearly define the matter for which protection is sought (Article 6 and Rule 6.2(a) PCT).

Re Item V.

- 2) Reference is made to the following document:
 - D1: EP 1 292 007 A (TOYOTA JIDOSHA KABUSHIKI KAISHA; DENSO CORPORATION) 12 March 2003 (2003-03-12)
 - D2: US-A-5 796 226 (OOKAWA ET AL) 18 August 1998 (1998-08-18)
 - D3: EP-A-0 748 038 (KOLLMORGEN CORPORATION) 11 December 1996 (1996-12-11)
 - D4: GB 970 003 A (UNITED KINGDOM ATOMIC ENERGY AUTHORITY) 16 September 1964 (1964-09-16)
- 3) The present application does not meet the criteria of Article 33(1) PCT, because the subject-matter of claim 1 is not new in the sense of Article 33(2) PCT.

Document D1 discloses a control map (cf. column 11, lines 56 - 57) for the controller (2) of an electrical machine (1) having a rotor (102) and at least one electrically energisable phase winding (103A - 103L), the control map comprising a predetermined advance angle profile representing energisation of the phase winding with respect to angular position of the rotor over a range of rotor speeds (Fig.8), and an angle correction factor (Δx) to be applied to a predetermined portion (x) of the advance angle profile.

Since independent claims 8 and 9 disclose only method steps corresponding to the feature of claim 1, the same reasoning as given for claim 1 will apply mutatis mutandis.

Therefore claims 8 and 9 also do not meet the requirements of the PCT in respect of novelty (Article 33(2) and (3) PCT).

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/GB2005/000297

4) Dependent claims 2-7, 10-20 do not contain any features which, in combination with the features of any claim to which they refer, meet the requirements of the PCT in respect of novelty and/or inventive step (Article 33(2) and (3) PCT).

Document D1 discloses the features of dependent claims 2, 3, 7, 9, 11 - 13 and 15 - 20 (cf. paragraphs [0044] and [0047] - [0055]). Therefore claims 2, 3, 7, 9, 11 - 13 and 15 - 20 are not new in the sense of Article 33 (2) PCT.

The features of dependent claims 4 and 5 have already been employed for the same purpose in a similar control map, see document D2, abstract. It would therefore be obvious to the person skilled in the art, to apply these features with corresponding effect to a control map according to document D1, thereby arriving at a control map according to claims 4 and 5.

The same applies also to claims 6 and 10 vis-à-vis documents D1 and D3 (page 7, lines 29 - 32 and page 8, lines 20 - 24) and to claim 14 vis-à-vis documents D1 and D4 (page 1, lines 39 - 52).
